Summary of Plumtree Corporate Portal competencies and qualifications including size and scope

Client: A Large Healthcare Provider **May 2008 to Present**

Project: Portal consultant – Infrastructure Tuning

Overview

Consultant is currently engaged by the company as an ALUI consultant and Java developer. Environment is highly complex running on AIX Unix and Websphere. Highly fault tolerant environment with many components including F5, Cisco, IBM Frames, and Oracle. Consultant responsible for providing ALUI portal – Software As A Service (SaaS). The portal supports three current projects and there are plans to add additional projects in the future. Consultant is responsible for working with all groups to resolve all portal related issues and assist with implementations, upgrades, and maintenance. The portal user base totals 25,000 users and clients internationally. The solution provides intranet healthcare applications and publicly available web portals for internet consumers.. The solution is integrated with Publisher 6.4, Collaboration Server 4.2, Studio 2.2, Oracle 10g, LDAP, Vignette, and a host of third party Healthcare applications.

Client: A Large Oil Services Company **June 2006 to Sept. 2007**

Project: Portal consultant – Application Development

Overview

Consultant was engaged by the company as the ALUI .NET developer. Consultant was the primary developer and IT stakeholder for a portal custom application that was designed to interface with Documentum. Consultant was responsible for full Software Development Life Cycle. Tasks included gathering requirements, documenting specifications, working with clients to design user interface using ALUI best practices and finally code and test solution. The solution provided an application that stored all content in Documentum and allowed the Proposals department to efficiently and effectively answer RFPs and research previously stored Proposals..

Client: A Major Wellsite Information Services Company **June 2005 to June 2006**

Project: Intranet Portal Development

Overview

Consultant was engaged by the company as the Plumtree lead consultant and Java developer; initially asked to stabilize both development and staging environments. Developed architecture for the production environment and documented the security strategy. Using Java and J2EE Specs, coded multiple Activity Spaces, Custom PEI's, custom pluggable navigation, and Plumtree native code enhancements. The portal user base will eventually total 5,000 users and clients internationally. The solution provides Drilling Instrumentation Systems and Wellsite

Reporting data. The solution is integrated with Content Server 6.0, Collaboration Server 4.2, BEA WebLogic 8.1, Tomcat 5.5, Oracle 9, Active Directory. Some portlets will be JSR 168/ WSRP compliant.

Client: A Major Online Automotive Advertising Agency Jan 2005 to June 2005

Project: Intranet Portal Development

Overview

Consultant was engaged by the company as the team architect and the lead technical consultant. Developed a robust, fault tolerant architecture where nearly every component of Plumtree Corporate Portal 5.0.4 was replicated, mirrored, or highly available. Consultant developed a custom pluggable navigation that provided a very unique user interface for the portal; further developed portlet development approach using standard templates for the portlet types. Using Java and J2EE Specs, coded multiple adaptive portlets, Activity Spaces, Custom PEI's and PRC's. Consultant developed coding standards and constructs to aid in development. Consultant acted as the Portal Architect and consultant on security and content management topics. The portal user base will eventually total 1,500 users dispersed in all 50 states in the United States. The solution provides critical knowledge management, document management, and collaborative capabilities. Integrated Content Server 6.0, Studio Server 2.0, Collaboration Server 4.2, BEA WebLogic 8.1, Tomcat 5, Rhythmyx CMS 5, Oracle 9, Active Directory. Some portlets will be JSR 168/ WSRP compliant.

Project: Two Portals – One External Facing and One Internal facing

Overview

As a Plumtree employee, engaged by the company to serve the role of Engagement Manager. The project resulted in the delivery of an internal B2E portal for 25,000 users and a B2B portal for 3000 of the company's largest clients. The portal integrated XML data, Peoplesoft self-service, premium content and other custom integrated applications. Some of the more critical steps involved:

- Developing a scalable Architecture for a mission critical portal
- Performing load and scalability testing
- Selection of gadgets based on business requirements,
- Integrating Peoplesoft
- Marketing to and training 25,000 users

Portal provides value by allowing end users to easily located mission critical data from one location. The ability to collaborate online addresses a major shortcoming of the organization.

Client: A Major Financial Services Company

Project: Upgrade to Plumtree 4.5WS SP1

Overview

Engaged by the company to serve the role of technical lead/expert. The Knowledge Management Portal had several outstanding issues that 4.5WS SP1 would correct. The portal had 1500 users. Upgraded all 4 environments (Development, Test, Stage, and Production in 5 weeks). Upgraded various usability aspects. Concluded engagement as a total success.

Client: A Major Healthcare Products Company

Project: Corporate Portal Implementation

Overview

Engaged by the company to Implement their corporate portal infrastructure and assist in the portal deployment planning. The solution was based on Plumtree Corporate Portal 4.0 The infrastructure components included multiple Plumtree Web servers and Job Servers running on Windows 2000. The database vendor was Oracle, using version 8i. Two thousand users including Sales executives using the portal viewed all manner of structured and unstructured content. The portal brought together industry news, e-mail and calendar services, product literature and best practices. It integrates with existing corporate applications written in Cold Fusion and Lotus Notes.

Client: An Internet Professional Services Consultancy

Project: A Knowledge Management Portal

Overview

The company is deploying the Plumtree Corporate Portal in offices in the United States and Europe to support rapid company growth driven by customer demand in the Global 1000 clients. The Plumtree-powered portal assembles market news and research from the company's intranet and external subscription services such as Goldman Sachs, Media Metrix and Compariscope in a searchable content directory, giving the company's consultants a broad perspective on the sprawling Internet economy from a single site. Consultant profiles and

qualifications can be searched and best practices for consultants on assignment are also available through the portal. Plumtree Gadgets allow employees to find industry experts quickly, and collaborate closely to help clients achieve their business goals.

The portal contains a directory of documents from public and secure sites for market research, software analysis, audience measurement and Web advertising tracking; Gadgets for searching a project collaboration database and staffing system; a gadget for subscribing or un-subscribing to threaded discussion forums.
